## **DETAILED ACTION**

Claims 9-13, 15-18 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Applicant's arguments in the parent application as to why claims 1, 5, 6 are allowable mean the associated claim limitations are considered *surrender generating limitations*. As such, these limitations must be retained and not broadened (retained essentially word-for-word) in reissue claims 9, 15. Also, the "error" recited in the declaration is to remove the surrender generating limitation from claim 1 by the addition of claim 9; as noted above, since this limitation cannot be broadened or eliminated without creating recapture, a new "error" will need to be recited.

The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. The declaration must specifically identify at least one error that is relied upon to support the reissue application, i.e., the basis for the reissue. The error must be phrased in terms of what is *wrong* with the patent. The statement that "[n]ewly presented independent claim 9 is broader than as-issued independent claim 1" and "does not recite the feature 'a plurality of sensors operable to produce force signals indicative of the forces in said struts," is insufficient and does not meet the above criterion. It is sufficient that the reissue declaration identify a single word, phrase, or expression in an original claim and how it renders the original patent wholly or partly inoperative or invalid; a corrective action statement is not required.

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following: The "reviewed and understand" statement must refer to –amendments referred to above–; in this regard, the dates of each amendment must be listed or the declaration should simply specify –all amendments to date–. A supplemental declaration should be filed. Any supplemental declaration must include an updated "no deceptive intent" statement to cover the changes made by amendments subsequent to the last declaration.

Claims 1-13, 15-18 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defects in the declaration is set forth in the discussion above in this Office action.

Application/Control Number: 10/763,074 Page 4

Art Unit: 3643

If an acceptable declaration and claims are filed, this application will be passed to issue.

The premature indication of allowability is regretted.

Summary: Claims 1-13, 15-18 have been rejected; claims 14, 19 have been canceled.
